

As a supplier of innovative plumbing systems suitable for potable water, central heating & UFH: The Buteline Plumbing System comprises of highly flexible Polybutene-1 (PB-1) pipe, specially designed 1-piece fittings, and does away with O-rings and inserts. The ClampSeal method means leak free joints.

This Continuing Professional Development (CPD) seminar is certified by the Construction CPD Certification Service and aims to give increased knowledge and confidence in plastic pipework systems.

The CPD will give you one CPD hour certification and covers the following subjects:

Key Advantages

The superior capabilities of plastic plumbing compared to other types of materials, such as endurance and performance in both low and high temperature applications.

Manufacturing Standards & Accreditations

Buteline's commitment to excellence mean that products are produced to consistently high engineering standards and tolerances not only to meet, but exceed the latest industry standards and accreditations.

Polybutene-1 Plumbing System Design

The System that is based on hydraulic engineering principles to give increased flow rates, reduce friction loss and guaranteed leak free fittings!

Plastic Pipes & the Environment

If you think plastic contains nasty toxins, is non-degradable and must be really bad for the environment, you might want to think again! Polybutene-1 is hygienic, non-toxic and 100% recyclable, which makes it an environmentally friendly product.

If you would like to find out more about any of the above please click on the following link: <http://www.buteline.com/uk/contact-us/> or call us on 0800 043 8883 to book this CPD now!
